

Thanks

Thank You!

I want to thank some people for their help on different stages of ConfigureMe in alphabetical order by first name 🙏

Jason Brittain

For a lot of early feedback, nightly discussions and great ideas. But the way if you ever needed to configure a tomcat [check out his book at amazon](#).

Matthias Koch

For the idea of yaml/json as configuration format and for sharing his ideas in the preparation phase of this project.

Slawomir Chodnicki

For common work on the first prototype and many hours of shared work.
