

MoSKito-Inspect WebUI Configuration

After reading this section, you will know...

... how to configure MoSKito with external configuration file, via [ConfigureMe](#) system.

In this section:

- [Sections](#)
 - [UsageMode](#)
 - [Personal](#)
 - [Shared](#)

Sections

UsageMode

The **UsageMode** setting can take one of two values: **PERSONAL** or **SHARED**. The difference between the usage modes is in server connectivity. In **Personal** usage mode the server connect is **application wide**, in **Shared** usage mode - bound to **user session**.

Personal

Personal usage mode suggests that the user is using its own copy of moskito inspect without interference with others.

```
"usageMode" : "PERSONAL"
```

Shared

Multiple users are sharing one copy of moskito inspect.

```
"usageMode" : "SHARED"
```
